

**Press Release:**

"Cooperation between ABICOR Binzel and Regula Systems Announced"

ABICOR Binzel and Regula Systems are announcing a global cooperation:

Prof. Dr. Emil Schubert, CEO of ABICOR Binzel said: "The Regula Gas Saving equipment is an excellent fit to the product offering of Binzel. We are specialized in welding torches and peripheral equipment and are the market leaders for robotic welding torches.

Regula gas saving equipment can provide additional benefit for our existing customer base."

Sigmund Røeggen, Chairman of Regula Systems fully agrees: "ABICOR Binzel is the ideal marketing partner for our patented products. Gas savings up to 60 % are possible on all welding processes, GMA, TIG and Plasma welding, both manual and robotic welding. The distribution power of ABICOR Binzel will help our product range to find broad market entry."

The products will be marketed under the Regula brand, since Regula has built up a very good image with this innovative product range, as both companies agree.
